

NDA Newsletter

Summer 2024

Dear Friends in the Nordic Dermatology Association. Summer is approaching and we are all busy on making plans for the coming holidays. But never the less there still are a lot of activities in the NDA.

Again a team of young dermatologist, this time from all the member countries, have arranged a young investigators meeting at the EADV, this year in Amsterdam. Last year in Berlin the meeting was a great success. It gives the participant the possibility to present their work and discuss it with other young researchers from the Nordics, and perhaps most importantly offers the opportunity to create new contacts and network across the borders.

Please see our website for the invitation.

Speaking of the website, remember to check up on our courses We have just held the 8th Dermoscopy course in Gothenburg and will have the Nordic Laser course in Copenhagen in June.

We have also had the first NDA lectures in Sweden and Norway. The concept being that the NDA supports a lecture at each of the Nordic countries' meeting, provided that the lecturer comes from a different Nordic Country. At the national Swedish meeting Jesper Elberling From Copenhagen gave a lecture on *Navigating the Ichtyverse to perceive our symphony of skin sensations*.

At the annual spring meeting of the Norwegian Society, the NDA guest lecture was held by Dr Maria Karlsson from Stockholm, who gave an instructive and interesting presentation on acute pediatric dermatology.

Finally – we now have less than a year until we meet in Helsinki. Please join us in the beautiful capital of Finland. The program is very exciting and very soon new information will follow

MORE INFORMATION WILL BE AVAILABLE ON
